Patient Centered Medical Home

Doctor-prescribed education

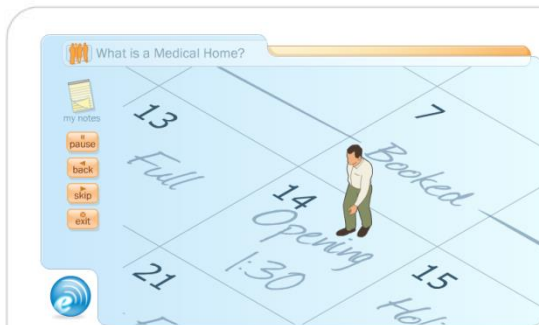

We consider you the most important member of your health care team. We want you to have the best and safest experience possible. To help you better understand what a patient centered medical home is, your doctor strongly suggests that you view an Emmi® program.

What is a Patient Centered Medical Home?

The Patient Centered Medical Home is an approach to providing comprehensive primary care that facilitates partnerships between individual patients, their personal physicians and, when appropriate, the patient's family. The medical home is designed to enable you with better access to health care, increase satisfaction you're your care, and improve your health. Register below to find out how the Patient Centered Medical Home applies to you!

Watch the program as many times as you like, with your family, friends or anyone else who may be involved in your care. There are additional Emmi programs available – ask your health care provider about other Emmi programs that might be right for you.
