What Emotions Do for You

EMOTIONS MOTIVATE (AND ORGANIZE) US FOR ACTION

- Emotions motivate our behavior. Emotions prepare us for action. The action urge of specific emotions is often “hard-wired” in biology.
- Emotions save time in getting us to act in important situations. Emotions can be especially important when we don’t have time to think things through.
- Strong emotions help us overcome obstacles—in our minds and in the environment.

EMOTIONS COMMUNICATE TO (AND INFLUENCE) OTHERS

- Facial expressions are hard-wired aspects of emotions. Facial expressions communicate faster than words.
- Our body language and voice tone can also be hard-wired. Like it or not, they also communicate our emotions to others.
- When it is important to communicate to others, or send them a message, it can be very hard to change our emotions.
- Whether we intend it or not, our communication of emotions influences others.

EMOTIONS COMMUNICATE TO OURSELVES

- Emotional reactions can give us important information about a situation. Emotions can be signals or alarms that something is happening.
- Gut feelings can be like intuition—a response to something important about the situation. This can be helpful if our emotions get us to check out the facts.
- **Caution:** Sometimes we treat emotions as if they are facts about the world: The stronger the emotion, the stronger our belief that the emotion is based on fact. (Examples: “If I feel unsure, I am incompetent,” “If I get lonely when left alone, I shouldn’t be left alone,” “If I feel confident about something, it is right,” “If I’m afraid, there must be danger,” “I love him, so he must be OK.”)
- If we assume that our emotions represent facts about the world, we may use them to justify our thoughts or our actions. This can be trouble if our emotions get us to ignore the facts.
What Makes It Hard to Regulate Your Emotions

**BIOLOGY**
- Biological factors can make emotion regulation harder.

**LACK OF SKILL**
- You don’t know what to do to regulate your emotions.

**REINFORCEMENT OF EMOTIONAL BEHAVIOR**
- Your environment reinforces you when you are highly emotional.

**MOODINESS**
- Your current mood controls what you do instead of your Wise Mind.
- You don’t really want to put in time and effort to regulate your emotions.

**EMOTIONAL OVERLOAD**
- High emotional arousal causes you to reach a skills breakdown point.
  You can’t follow skills instructions or figure out what to do.

**EMOTION MYTHS**
- Myths (e.g., mistaken beliefs) about emotions get in the way of your ability to regulate emotions.
- Myths that emotions are bad or weak lead to avoiding emotions.
- Myths that extreme emotions are necessary or are part of who you are keep you from trying to regulate your emotions.

Check the Facts

**FACTS**

Many emotions and actions are set off by our thoughts and interpretations of events, not by the events themselves.

<table>
<thead>
<tr>
<th>Event</th>
<th>Thoughts</th>
<th>Emotions</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Our emotions can also have a big effect on our thoughts about events.

<table>
<thead>
<tr>
<th>Event</th>
<th>Emotion</th>
<th>Thoughts</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Examining our thoughts and checking the facts can help us change our emotions.

**HOW TO CHECK THE FACTS**

1. Ask: What is the emotion I want to change?  
   (See Emotion Regulation Handout 6: Ways of Describing Emotions.)

2. Ask: What is the event prompting my emotion?  
   Describe the facts that you observed through your senses.  
   Challenge judgments, absolutes, and black-and-white descriptions.  
   (See Mindfulness Handout 4: Taking Hold of Your Mind: “What” Skills.)

3. Ask: What are my interpretations, thoughts, and assumptions about the event?  
   Think of other possible interpretations.  
   Practice looking at all sides of a situation and all points of view.  
   Test your interpretations and assumptions to see if they fit the facts.

4. Ask: Am I assuming a threat?  
   Label the threat.  
   Assess the probability that the threatening event will really occur.  
   Think of as many other possible outcomes as you can.

5. Ask: What’s the catastrophe?  
   Imagine the catastrophe really occurring.  
   Imagine coping well with a catastrophe (through problem solving, coping ahead, or radical acceptance).

6. Ask: Does my emotion and/or its intensity fit the actual facts?  
   Check out facts that fit each emotion.  
   Ask Wise Mind.  
   (See Emotion Regulation Handout 11: Figuring Out Opposite Actions, and Emotion Regulation Handout 13: Reviewing Problem Solving and Opposite Action.)

Opposite Action and Problem Solving: Deciding Which to Use

Opposite action = Acting opposite to an emotion’s action urge
Problem solving = Avoiding or changing (solving) a problem event

Ask:
Does this emotion fit the facts?

Yes
Check the facts

No

Ask:
Is acting on this emotion effective?

Check Wise Mind

Yes

No

Be mindful of current emotions
(Emotion Regulation Handout 22)

Act on emotion/ action urge

Problem-solve unwanted emotions
(Emotion Regulation Handout 12)

Do not act on emotion/ action urge
Consider opposite action
(Emotion Regulation Handout 10–11)

Do not act on emotion/ action urge
Change thoughts to fit the facts
(Emotion Regulation Handout 8)

Do opposite action
(Emotion Regulation Handout 10–11)

Be mindful of current emotions
(Emotion Regulation Handout 22)

Act, but accept the consequences gracefully
Reconsider opposite action

Opposite Action

Use opposite action when your emotions do NOT fit the facts or when acting on your emotions is NOT effective.

EVERY EMOTION HAS AN ACTION URGE.

CHANGE THE EMOTION BY ACTING OPPOSITE TO ITS ACTION URGE.

Consider these examples:

<table>
<thead>
<tr>
<th>EMOTION</th>
<th>ACTION URGE</th>
<th>OPPOSITE ACTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fear</td>
<td>Run away/avoid</td>
<td>Approach/don’t avoid</td>
</tr>
<tr>
<td>Anger</td>
<td>Attack</td>
<td>Gently avoid/be a little nice</td>
</tr>
<tr>
<td>Sadness</td>
<td>Withdraw/isolate</td>
<td>Get active</td>
</tr>
<tr>
<td>Shame</td>
<td>Hide/avoid</td>
<td>Tell the secret to people who will accept it</td>
</tr>
</tbody>
</table>

HOW TO DO OPPOSITE ACTION, STEP BY STEP

Step 1. IDENTIFY AND NAME THE EMOTION you want to change.

Step 2. CHECK THE FACTS to see if your emotion is justified by the facts.
    Check also whether the intensity and duration of the emotion fit the facts.
    (Example: “Irritation” fits the facts when your car is cut in front of; “road rage” does not.)
    An emotion is justified when your emotion fits the facts.

Step 3. IDENTIFY AND DESCRIBE YOUR ACTION URGES.

If your emotion does not fit the facts or if acting on your emotion is not effective:

Step 5. IDENTIFY OPPOSITE ACTIONS to your action urges.

Step 6. ACT OPPOSITE ALL THE WAY to your action urges.

Step 7. REPEAT ACTING OPPOSITE to your action urges until your emotion changes.

Do progressive relaxation, paced breathing, and/or Wise Mind exercises; listen to music or guided imagery; review the distress tolerance crisis survival skills. |
| 2.   | Choose a recurring nightmare you would like to work on.  
This will be your target nightmare. Select a nightmare you can manage now. Put off trauma nightmares until you are ready to work with them—or, if you target a trauma nightmare, skip Step 3. |
| 3.   | Write down your target nightmare.  
Include sensory descriptions (sights, smells, sounds, tastes, etc.). Also include any thoughts, feelings, and assumptions about yourself during the dream. |
| 4.   | Choose a changed outcome for the nightmare.  
The change should occur BEFORE anything traumatic or bad happens to you or others in the nightmare. Essentially, you want to come up with a change that will prevent the bad outcome of the usual nightmare from occurring. Write an ending that will give you a sense of peace when you wake up.  
*Note: Changes in the nightmare can be very unusual and out of the ordinary (e.g., you might become a person with superhuman powers who is able to escape to safety or fight off attackers). Changed outcomes can include changed thoughts, feelings, or assumptions about yourself.* |
| 5.   | Write down the full nightmare with the changes. |
| 6.   | REHEARSE and RELAX each night before going to sleep.  
Rehearse the changed nightmare by visualizing the entire dream with the changes each night, *before* practicing relaxation techniques. |
| 7.   | REHEARSE and RELAX during the day.  
Visualize the entire dream with the change, and practice relaxation as often as possible during the day. |

Sleep Hygiene Protocol
When You Can’t Sleep, What to Do Instead of Ruminating

TO INCREASE THE LIKELIHOOD OF RESTFULNESS/SLEEP:
1. Develop and follow a consistent sleep schedule even on weekends. Go to bed and get up at the same times each day, and avoid anything longer than a 10-minute nap during the day.
2. Do not use your bed in the daytime for things like watching TV, talking on the phone, or reading.
3. Avoid caffeine, nicotine, alcohol, heavy meals, and exercise late in the day before going to sleep.
4. When prepared to sleep, turn off the light, and keep the room quiet and the temperature comfortable and relatively cool. Try an electric blanket if you are cold; putting your feet outside of the blanket or turning on a fan directed toward your bed if you are hot; or wearing a sleeping mask, using earplugs, or turning on a “white noise” machine if needed.
5. Give yourself half an hour to at most an hour to fall asleep. If it doesn’t work, evaluate whether you are calm, or anxious (even if only “background anxiety”), or ruminating.
6. DO NOT CATASTROPHIZE. Remind yourself that you need rest, and aim for reverie (i.e., dreaminess) and resting your brain. Sell yourself on the idea that staying awake is not a catastrophe. Do not decide to give up on sleeping for the night and get up for the “day.”

IF YOU ARE CALM BUT WIDE AWAKE:
7. Get out of bed; go to another room and read a book or do some other activity that will not wake you up further. As you begin to get tired and/or sleepy, go back to bed.
8. Try a light snack (e.g., an apple).

IF YOU ARE ANXIOUS OR RUMINATING
9. Use the cold water TIP skill. Get right back in bed and do the paced breathing TIP skill. (See Distress Tolerance Handout 6: TIP Skills: Changing Your Body Chemistry.) Remember, if you have any medical condition, get medical approval before using cold water.
10. Try the 9–0 meditation practice. Breathe in deeply and breathe out slowly, saying in your mind the number 9. On the next breath out, say 8; then say 7; and so on until you breathe out saying 0. Then start over, but this time start with 8 (instead of 9) as you breathe out, followed by 7, and so on until you reach 0. Next start with 6 as you breathe out, and so on to 0. Then start with 5, then with 4, and so on until you have gone all the way down to starting with 1. (If you get lost, start over with the last number you remember.) Continue until you fall asleep.
11. Focus on the bodily sensation of the rumination (rumination is often escape from difficult emotional sensations).
12. Reassure yourself that worries in the middle of the night are just “middle-of-the-night-thinking,” and that in the morning you will think and feel differently.
13. Read an emotionally engrossing novel for a few minutes until you feel somewhat tired. Then stop reading, close your eyes, and try to continue the novel in your head.
14. If rumination doesn’t stop, follow these guidelines: “If it’s solvable, solve it. If it is insolvable, go deep into the worry all the way to the “catastrophe”—the very worst outcome you can imagine—and then imagine coping ahead with the catastrophe.” (See Emotion Regulation Handout 19: Build Mastery and Cope Ahead.)

If nothing else works, with eyes closed, listen to public radio (BBC, NPR, etc.) at low volume (use headphones if necessary). Public radio is a good choice for this, because there is little fluctuation in voice tone or volume.

Overview:
Managing Really Difficult Emotions

MINDFULNESS OF CURRENT EMOTIONS
Suppressing emotion increases suffering.

Mindfulness of current emotions is the path to emotional freedom.

MANAGING EXTREME EMOTIONS
Sometimes emotional arousal is so high that you can’t use any skills, particularly if the skills are complicated or take any thought on your part.

This is a skills breakdown point.

Crisis survival skills are needed.

TROUBLESHOOTING AND REVIEW
There are many ways to change emotions.

It can be helpful to have a list of the important skills to look at when you can’t remember the skills you need to regulate your emotions.
Mindfulness of Current Emotions: Letting Go of Emotional Suffering

**OBSERVE YOUR EMOTION**

- Step back and just notice your emotion.
- Experience your emotion as a WAVE, coming and going.
- Now imagine surfing the emotion wave.
- Try not to BLOCK or SUPPRESS the emotion.
- Don't try to GET RID of or PUSH away the emotion.
- Don't try to KEEP the emotion around.
- Don't HOLD ON to it.
- Don't AMPLIFY it.

**PRACTICE MINDFULNESS OF BODY SENSATIONS**

- Notice WHERE in your body you are feeling emotional sensations.
- Experience the SENSATIONS as fully as you can.
- Observe how LONG it takes before the emotion goes down.

**REMEMBER: YOU ARE NOT YOUR EMOTION**

- Do not necessarily ACT on your emotion.
- Remember times when you have felt DIFFERENT.

**PRACTICE LOVING YOUR EMOTION**

- RESPECT your emotion.
- Do not JUDGE your emotion.
- Practice WILLINGNESS.
- Radically ACCEPT your emotion.
Troubleshooting Emotion Regulation Skills: When What You Are Doing Isn’t Working

CHECK YOUR BIOLOGICAL SENSITIVITY

1. **ASK:** Am I biologically more vulnerable?
   - Do I have untreated physical illness or distress?
   - Am I out of balance on eating, use of drugs, sleep, exercise?
   - Have I taken medications as prescribed?

2. **WORK** on your PLEASE skills.
   1. Take care of physical illness and distress.
   2. Take medications as prescribed. Check if others are needed.
   3. Try again.

CHECK YOUR SKILLS

2. **REVIEW** what you have tried.
   - Did you try a skill likely to be effective?
   - Did you follow the skill instructions to the letter?

3. **WORK** on your skills.
   1. Review and try other skills.
   2. Get coaching if you need it.
   3. Try again.

CHECK FOR REINFORCERS

3. **ASK:** Do my emotions . . .
   - COMMUNICATE an important message or influence people to do things?
   - MOTIVATE me to do things I think are important?
   - VALIDATE my beliefs or my identity?
   - FEEL GOOD?

4. **IF YES:**
   1. Practice interpersonal effectiveness skills to communicate.
   2. Work to find new reinforcers to motivate yourself.
   4. Do PROS AND CONS for changing emotions.
      (See Emotion Regulation Worksheet 1.)

(continued on next page)
CHECK YOUR MOOD

• ASK: Am I putting in the time and effort that solving my problem will take?

• IF NO:
  1. Do PROS AND CONS for working hard on skills.
  2. Practice RADICAL ACCEPTANCE and WILLINGNESS skills.
  3. Practice the mindfulness skills of PARTICIPATING and EFFECTIVENESS
     (See Mindfulness Handouts 4 and 5.)

CHECK FOR EMOTIONAL OVERLOAD

• ASK: Am I too upset to use complicated skills?

• IF YES, ask: Can the problems I am worrying about be easily solved now?
  • IF YES, do PROBLEM SOLVING.
    (See Emotion Regulation Handouts 9, 12.)
  • IF NO, practice mindfulness of CURRENT EMOTIONS.
    (See Emotion Regulation Handout 22.)

• IF your emotions are too high for you to think straight:
  • Go to TIP skills.
    (See Distress Tolerance Handout 5.)

CHECK FOR EMOTION MYTHS GETTING IN THE WAY

• CHECK FOR:
  Judgmental myths about emotions (e.g., “Some emotions are stupid,” “There is a right way to feel in every situation”)?
  Beliefs that emotions and identity are the same (e.g., “My emotions are who I am”)?

• IF YES:
  1. Check the facts.
  2. Challenge myths.
  3. Practice thinking nonjudgmentally.

Figuring Out What My Emotions Are Doing for Me

Due Date: _______ Name: _________________________ Week Starting: _______

Select a current or recent emotional reaction and fill out as much of this sheet as you can. If the prompting event for the emotion you are working on is another emotion that occurred first (for example, feeling afraid prompted getting angry at yourself), then fill out a second worksheet for that first emotion. Write on the back of the sheet if you need more room. Remember to use your describe skills for each question.

EMOTION NAME: ___________________________ INTENSITY (0–100): ___

Describe Prompting Event
What happened to prompt this emotion?

Describe Motivation to Action
What action was my emotion motivating and preparing me to do? (Was there a problem my emotion was getting me to solve, overcome, or avoid?) What function or goal did my emotion serve?

Describe Communication to Others
What was my facial expression? Posture? Gestures? Words? Actions?

What message did my emotion send to others (even if I didn’t intend to send the message)?

How did my emotion influence others (even if I didn’t intend to influence them)? What did others do or say as a result of my emotional expression or actions?

Describe Communication to Myself
What did my emotion say to me?

What facts could I check out to be sure the message my emotions were sending to me was correct?

What facts did I check out?

Check the Facts

Due Date: ________  Name: __________________________  Week Starting: ________

It is hard to problem-solve an emotional situation if you don’t have your facts straight. You must know what the problem is before you can solve it. This worksheet helps you figure out whether it is the event that is causing your emotion, your interpretation of the event, or both. Use your mindfulness skills of observing and describing. Observe the facts, and then describe the facts you have observed.

Step 1  Ask: What emotion do I want to change?

EMOTION NAME: ______________ INTENSITY (0–100) Before: ___ After: ___

Step 2  Ask: What is the PROMPTING EVENT for my emotional reaction?

DESCRIBE THE PROMPTING EVENT: What happened that led you to have this emotion? Who did what to whom? What led up to what? What is it about this event that is a problem for you? Be very specific in your answers.

CHECK THE FACTS!

Look for extremes and judgments in the way you are describing the prompting event.

REWRITE the facts, if necessary, to be more accurate.

Facts ➔

Step 3  Ask: What are my INTERPRETATIONS (thoughts, beliefs, etc.) about the facts?

What am I assuming? Am I adding my own interpretations to the description of the prompting event?

CHECK THE FACTS!

List as many other possible interpretations of the facts as you can.

REWRITE the facts, if necessary. Try to check the accuracy of your interpretations. If you can’t check the facts, write out a likely or a useful (i.e., effective) interpretation.

Facts ➔

(continued on next page)

Step 4
Ask: Am I assuming a THREAT? What is the THREAT? What about this event or situation is threatening to me? What worrisome consequences or outcomes am I expecting?

CHECK THE FACTS!
List as many other possible outcomes as you can, given the facts.

REWRITE the facts if needed. Try to check the accuracy of your expectations. If you can’t check out probable outcomes, write out a likely noncatastrophic outcome to expect.

Step 5
Ask: What’s the CATASTROPHE, even if the outcome I am worrying about does occur? Describe in detail the worst outcome I can reasonably expect.

DESCRIBE WAYS TO COPE if the worst does happen.

Step 6
ASK: Does my emotion (or its intensity or duration) FIT THE FACTS? (0 = not at all to 5 = I am certain): 
If you are unsure whether your emotion or your emotional intensity fits the facts (for example, you give a score of 2, 3, or 4), keep checking the facts. Be as creative as you can be; ask others for their opinions; or do an experiment to see if your predictions or interpretations are correct.

Describe what you did to check the facts:
Figuring Out How to Change Unwanted Emotions

Once you have checked the facts, use this worksheet to help you figure out what to do next. Before you can figure out what to change, you have to decide whether acting on your emotion is effective in the situation you are in (and whether the emotion is one you actually want to change). (If you are not sure whether you want to change it or not, go back to Emotion Regulation Worksheet 1 and do pros and cons.) In the flow chart below, circle Yes or No at each level, and then select the skill that fits your situation best.

Emotion Name: ______________________

Ask:
Does this emotion fit the facts?
Check the facts

Yes

Ask:
Is acting on this emotion effective?
Check Wise Mind

Yes

Be mindful of current emotions
(Emotion Regulation Handout 22)
Act on emotion/action urge
Problem-solve unwanted emotions
(Emotion Regulation Handout 12)

No

Do not act on emotion/action urge
Consider opposite action
(Emotion Regulation Handouts 10–11)

No

Do not act on emotion/action urge
Change thoughts to fit the facts
(Emotion Regulation Handout 8)
Do opposite action
(Emotion Regulation Handouts 10–11)

Yes

Be mindful of current emotions
(Emotion Regulation Handout 22)
Act, but accept the consequences gracefully
Reconsider opposite action

Describe what you did to manage the emotion:

Opposite Action to Change Emotions

Due Date: __________ Name: ___________________________ Week Starting: __________

Select a current or recent emotional reaction that you find painful or want to change. Figure out if the emotion fits the facts. If it does not, then notice your action urges; figure out what would be opposite actions; and then do the opposite actions. Remember to practice opposite action all the way. Describe what happened.

EMOTION NAME: ___________________________ INTENSITY (0–100) Before: _____ After: _____

PROMPTING EVENT for my emotion (who, what, when, where): What prompted the emotion.

________________________________________________________________________

IS MY EMOTION (or its intensity or duration) JUSTIFIED? Does it fit the facts? Is it effective?

List the facts that justify the emotion and those that do not. Check the answer that is mostly correct.

☐ JUSTIFIED: Go to problem solving
(Emotion Regulation Worksheet 8)  ☐ NOT JUSTIFIED: Continue

ACTION URGES: What do I feel like doing or saying?

OPPOSITE ACTION: What are the actions opposite to my urges? What am I not doing because of my emotions? Describe both what and how to act opposite all the way in the situation.

WHAT I did: Describe in detail.

HOW I did it: Describe body language, facial expression, posture, gestures, and thoughts.

What AFTEREFFECT did the opposite action have on me (my state of mind, other emotions, behavior, thoughts, memory, body, etc.)?
Problem Solving to Change Emotions

Select a prompting event that triggers a painful emotion. Select an event that can be changed. Turn the event into a problem to be solved. Follow the steps below and describe what happened.

**Example:** **VALUE:** Be part of a group.

Possible **GOALS:**
- Reconnect with old friends.
- Get a more social job.
- Join a club.

Pick one **GOAL** to work on right now.
- Join a club.

Figure out a few **ACTION STEPS** that will move me toward my goal.

Check off any of the following that you did:

- Stepped back and just noticed the emotions I was experiencing.
- Experienced the emotion as waves, coming and going on the beach.
- Let go of judgments about my emotions.
- Noticed where in my body I was feeling the emotional sensations.
- Paid attention to the physical sensations of the emotions as much as I could.
- Observed how long it took the emotion to go away.
- Reminded myself that being critical of emotions does not work.
- Practiced willingness to have unwelcome emotions.
- Imagined my emotions as clouds in the sky, coming and going.
- Just noticed the action urge that went with my emotion.
